Stress Lessons: Stressed Out to Chilled Out Curriculum Connections New Brunswick

Grades 7–9

As of the 2017 school year, The Integrated Service Delivery model for providing mental health, addiction, intervention and social services to children and youth has been expanded to all public schools in the province of New Brunswick. Improving mental health services for children and youth is a component of the government's 10-year education plans, strategies for crime reduction and harm prevention, and the Mental Health Action Plan. Supporting people with mental health challenges is also one of the seven priority areas of the New Brunswick Family Plan.

Current research clearly identifies the importance of mental health to learning, as well as to students' social and emotional development. Students who experience positive mental health are resilient and better able to learn, achieve success and build healthy relationships. Given the important relationship between positive mental health and academic success, schools have an important role in nurturing students' positive mental health and well-being.

Program Lessons

Unit 1 All about stress

Unit 2 Your brain on stress
